

List of Practical Lessons in Biophysics and Medical Physics

Room A

1. Spectrophotometry, Measurement of Absorbance and Reflectance
2. Bioimpedance Body Composition Method, Calculation of Body Surface and Basal Metabolism
3. Ionizing Radiation in Medicine and Its Detection
4. Electrocardiography

Room B

5. Spirometry and Oximetry
6. Diagnostic ultrasound
7. Electrodiagnostics, electrotherapy and therapeutic ultrasound.

Room C

8. Blood Pressure Measurement: Auscultatory and Oscillometric Principles
9. Optics

Room D

10. Audiometry
